Subject: Microsoft settlement

It is time for this ridiculous attack of Microsoft by our own government to end. Microsoft Corporation has created and helped create a huge industry that has benefitted millions of Americans. I consider it senseless to attack a successful AMERICAN company that has greatly increased the prosperity of Americans and the American economy.

As a consumer and an American, I am in full support of competition in the market place without government deciding who shall compete. This action brought by Clinton's Justice Department has wasted public funds in order to take sides in something that should be left to the market place. It's time to end it!
